4. It is, of course, not easy to ride herd on the sanitization of information essential to merican military units. It is even more difficult, because of the politics and diplomacy involved, to cut off the flow of information or to begin to become restrictive in our dealings with allied intelligence services.

- 5. I have directed an early completion of the current task force effort in the Agency which is simed at advising you on the extent and dangers of intelligence exchanges with foreign countries.
- 6. I recommend you discuss the following in Executive Session at USIB:
 - a. that you ask Joe Carroll to report fully on this particular case, not only to you but to USIB and that you ask Joe for DIA recommendations growing out of the lessons learned in this incident:
 - b. that you urge all USIB principals to take a hard look at requests for exotic clearances, sanitization of exotically acquired information and release of high-powered publications to foreign governments.

/s/ MSC Marshall S. Carter DDCI
